> You don't often get email from palomaronca@gmail.com. Learn why this is important

Good morning,

I am writing to you today as a community member to submit public comment on Docket No. 676. I strongly believe that we need to establish the multi year framework that HB 3179 lay out. As a young person who rents, my utility bill in the summer months is about three times higher than in the winter months. This is because my appartment was not built to insulate from heat, and I have no central air conditioning. The portable AC units that I have raise my electric bill substantially and my appartment is still often 90 degrees inside on hot days. Having reliable utility rates that I can predict and budget for is essential for me to be able to make it through the summer months. I am asking the commission to enact these multi year rate plans so that I and others like me are not hit with multiple utility rate increases during the year, making heating and cooling even more of a challenge than it already is.

Thank you for your time and the opportunity to comment.

Best,
Paloma Ronca
