Subject: PCN 5 Boardman to Hemmingway Case

Please accept the following comments for consideration in the PCN 5 Boardman to Hemmingway case review.

The options submitted by Wendy King offering alternate routes A Blue and B Blue are totally unacceptable to us as landowners that would now be extremely impacted by the line and we were not given prior opportunity to oppose.

The proposed change A Blue and B Blue would greatly impact not only several homes we own but greatly impact our farming operations along Sandhollow, Baseline Lane and Spur Loop. The impact to high value irrigated agriculture and how we farm in the area would be quantifiably impacted. The exponential impact of the multiple energy sightings forthcoming in the proposed area would be very concerning.

We ask that you not make a change in route as proposed as the Wheatridge Alternative ref: pcn5htb15396.

Thank you
