**RE: UM 1811 Schedule 50 Retail Electric Vehicle Charging Rates Annual Review**

Portland General Electric Company (PGE) hereby submits this letter for Schedule 50 reporting purposes in compliance of OPUC Order No. 19-385 in Docket No. UM 1811 (Transportation Electrification). The purpose of the report is to notify the Public Utility Commission of Oregon (OPUC or Commission) on any learnings from our customers on Schedule 50, and to provide notice on whether PGE will be proposing any near-term price changes for the schedule as well.

On March 15, 2017, PGE filed its proposal for four new programs to accelerate transportation electrification in UM 1811. This was filed in compliance with OPUC Docket No. AR 599 (Implementing Senate Bill 1547). Commission Order No. 19-385 adopted the stipulation and authorized PGE to undertake three of the four proposed pilots, one of which is Electric Avenue. Schedule 50 provides the prices that are charged to all users of PGE's Electric Vehicle (EV) charging stations.

In 2019, PGE completed installation of four of the six Electric Avenue sites that are priced under Schedule 50 and has collected customer usage data for those stations. Over the course of the year, there were a total of 21,995 charges by customers with an average energy of 9.8 kWh and an average charge time of 45 minutes per charge. Of the total charges, 14,581 were made by customers who are on the subscription price option offered under Schedule 50 prices.

At this time, PGE is not proposing any price changes to Schedule 50 given the adoption rate is consistent with our expectations on EV adoption and usage. Also, Electric Avenue has been in service for less than a year, and PGE would like to have more data before proposing any pricing changes to Schedule 50.
