

LETTER OF SUPPORT

March 31, 2020

Dear Oregon Public Utility Commission,

It is our understanding that you will soon be reviewing the community solar applications for 3 or 4 projects submitted by Neighborhood Power Corporation. We are writing to support these applications and your Program. Our company has been working with Neighborhood Power for over 5 years and found them to be a reliable provider and seller of solar energy and a strong advocate of clean power across the nation.

Neighborhood Power has been educating us on the Oregon Community Solar project for many months and has kept us up to date as the program evolved. We are looking forward to participating in your Program.

Wyndham Destinations operates more than 220 vacation ownership resorts and 4,300 affiliated exchange properties. Currently, 65% of our locations committed to sustainability practices like recycling, local and organic food, renewable energy, and electric car charging stations. We have a corporate goal of reducing our carbon footprint by 40% by 2025. We welcome Programs like the one you developed in Oregon, that help businesses and individuals reach their sustainability goals and be better citizens of the local environment. Community solar programs make a lot of sense for multi-unit properties like our timeshare resorts. Please know, that large companies like Wyndham Destinations are supportive of your efforts to bring Community Solar Projects to businesses and residences that can't participate directly with onsite systems.

We currently have a signed Letter of Intent to buy power from one or more of the community solar projects developed by Neighborhood Power. We support those projects, and hope you will approve the applications, and look forward to participating with you in the launch of this new Oregon Community Solar Program. Thank you.

Sincerely,

WorldMark, The Club
