Subject: I Support Solar Oregon!

Hi Caroline,

My name is Amanda and I am a Portland resident and aspiring homeowner. I am 34, I currently work at a restaurant, and I am seriously looking into becoming a carpenter.

I am writing to share that I join Solar Oregon in supporting the direction of Staff's October 4th Recommendation, as a step toward ensuring people such as myself will be able to participate in this landmark program. Community solar achieves so many benefits for the state: equity; community engagement; economic development; and clean energy! Please allow more customers to participate in, and receive direct benefits from, the development of solar in Oregon.

I think that investing in solar is a great idea of Oregon's current and future economy. Thank you for your consideration!

Sincerely,
Amanda
