Subject: 5 year NESC Check in Results

When Comcast started the 10 year NESC inspection program in 2008 our records indicated Comcast had around 186,000 pole attachments, in 2012 our records had increased to 200,880 pole attachments. The increase was due to developing a better database for tracking new and existing attachments and an aggressive permitting program.

The percentage of poles inspected from 2008 through 2012 was 95,560 or 47.5 percent, using the total number of poles as of the end of 2012 as the denominator. The plan going forward is to complete the 10 year NESC inspection program and inspect the remaining 105,240 poles in the next 5 years. Comcast will inspect 21,048 poles per year or 10.5 percent on a yearly bases.

From 2008 through 2012 Comcast submitted 232 plans of correction on 36,329 alleged violations involving 23,471 poles. Comcast has participated in a number of Joint inspections with other pole occupants and pole owners such as Frontier, Centrylink, Portland General Electric and Springfield Electric Board.
