NAVIGATING A CHANGING TIME AND MEETING CUSTOMER NEEDS

Pacific Power remains dedicated to delivering safe, reliable, affordable power now and for years to come.

We recognize the impact that price increases have on our customers. As we make needed investments in our system and navigate economic trends, we will continue to take measures to keep our rates low and to capture savings for our customers.

On March 1, 2022, Pacific Power filed a general rate case requesting an overall rate change of \$82.2 million, or 6.6 percent, to become effective January 1, 2023. The company's requested change will be reviewed by the Public Utility Commission of Oregon and if approved, the expected impact on the average monthly bill for an average residential customer using 900 kWh per month would be \$13.01 per month. The primary reason for this filing is to support our wildfire mitigation efforts, including vegetation management, as part of our larger commitment to providing resilient, safe, reliable electricity for our customers.

We understand the impact that price increases have on our customers and will work to mitigate that impact as much as possible.
