October 10, 2025

Docket No. UM 1930: Community Solar Program (CSP) Update on Remaining Carve-out Capacity

Staff issues this communication as an advisory notice to stakeholders regarding unallocated Tier 2 carve-out capacity remaining in the Program. On October 2, 2025, in [Order No. 25-392](#), the Oregon Public Utility Commission expanded CSP carve-out capacity by 20 MW in Portland General Electric (PGE) and 30 MW in PacifiCorp (PAC) service areas. There are now 34.28 MW of unallocated carve-out capacity in PGE service territory and 31.28 MW of unallocated carve-out capacity in PAC service territory.

With Order No. 25-392 and the expansion of carve-out capacity, Staff now expects unallocated carve-out capacity to remain sufficient for the foreseeable future. Staff is suspending future docket updates on remaining carve-out capacity until it finds unallocated carve-out capacity is again limited. Until then, Staff directs stakeholders to the [Program Capacity web page](#) on the CSP website to view current unallocated Program capacity.

Staff Contact
