## **1. Commission Workshop Debrief**

*Discuss key takeaways from the Commission Workshop*

## **2. Issue discussion**

*Discuss opportunities to reach agreement on key components of Staff proposal:*

1. *Extent to which the Commission adopts/enforces standards for utilities (how prescriptive and applicable)*
2. *Proposed best practices*
  - a. *Capacity contribution*
    - i. *Capacity contribution/need models (a resource specific ELCC or resource agnostic LOLP)*
    - ii. *Time-based granularity (yearly values)*
    - iii. *Supply side resource requirements (committed resources, resource classes)*
    - iv. *Input data requirements (historical data, data sources, consideration for climate change)*
  - b. *Capacity value*
    - i. *Cost of capacity/avoided resource*
    - ii. *Delineation of capacity need (fixed ramp-in)*
3. *Requiring utilities to make a regular filing of capacity contribution data for transparency and administrative simplicity.*

## **3. Next steps (break for stakeholders to discuss with their internal teams at 3:00pm to 3:30pm)**

*Discuss options to continue moving docket forward:*

- *Proceed to Commission decision at Public Meeting*
- *Informational filings*
- *Continue discussion of issues (between parties or with Commission)*
