

## UM 2225 Investigation into Clean Energy Plans Docket Announcement-Resilience and Community Lens Workstream

HB 2021 establishes an ambitious emissions-based clean energy framework for electricity providers in Oregon.<sup>1</sup>

This announcement describes Oregon Public Utility Commission (OPUC or Commissions) Staff's continued work on Clean Energy Plans, particularly as it relates to the requirement to include within a clean energy plan "a risk-based examination of resiliency opportunities that includes costs, consequences, outcomes and benefits based on reasonable and prudent industry resiliency standards and guidelines established by the Public Utility Commission". A resiliency workshop was held, and information provided by the Department of Energy's Grid Modernization Lab Consortium regarding many aspects pertinent to resiliency across the country. This announcement includes links to a [resilience questionnaire](#) to ensure any outstanding questions DOE could provide insights into are shared. Please note that the survey is optional, but will advise of any potential further industry information important to consider.

***Staff requests that these responses be provided by July 22, 2022***

**To receive schedule updates, meeting notices and agendas, review comments and other materials related to the investigation, please send an email to [puc.hearings@puc.oregon.gov](mailto:puc.hearings@puc.oregon.gov) and ask to be added to the distribution list for Docket No. UM 2225.**

OPUC Staff appreciates input into the process to establish Clean Energy Plans and thanks you for your participation.

---

<sup>1</sup> HB 2021 is codified in Oregon Revised Statute (ORS) 469A.400 to 469A.475. Clean Energy Plan requirements are found primarily in Section 4 and Section 5 of HB 2021.
