JOHN L. HEBERLING, P.E.  
SENIOR COST OF SERVICE ANALYST / SENIOR CONSULTANT  
D. HITTLE & ASSOCIATES, INC., ENGINEERS AND CONSULTANTS

Public Utility Commission of Oregon  
Administrative Hearing Division

### Experience

Mr. Heberling has over 27 years of experience as a consultant to electric utilities, municipal, state and federal government agencies, private power developers, and banks and financial institutions involved with the funding of energy-related projects. With a strong focus on regulatory, economic and technical issues related to utility infrastructure systems, his practice has included development of numerous feasibility evaluations, planning studies, financial and economic analyses, rate studies, long-range operating projections, due diligence reviews and reports in the support of bond issuance and non-recourse loans. Much of his study work has been related to hydroelectric and thermal generating technologies and electric transmission systems. Mr. Heberling has been involved in a number of studies addressing various aspects of electric utility restructuring and competitive electric market issues.

Mr. Heberling's experience includes project management on numerous large planning studies, preparation of analyses and reports associated with the issuance of over \$4 billion of tax-exempt revenue bonds, evaluation of alternative ownership options for utility systems, estimation of the value of electric system facilities, economic evaluations of utility expansion and renewal alternatives, preparation of pro-forma projections of operating revenues and expenses for utility systems and development of analytical computer models.

Throughout his career, Mr. Heberling has had significant involvement in the development of cost of service retail rate designs. He is experienced in cost allocation methodologies, alternative allocation methodologies for acquisition costs and power cost allocation. In addition he has completed numerous retail rate designs including variations of customer basic charges and non-traditional rates such as for time of use service.

General project experience has included:

- Project management of numerous large planning study efforts.
- Preparation of analyses and reports associated with the issuance of over \$4 billion of tax-exempt revenue bonds to fund utility additions and improvements.
- Development of financing documents in coordination with client's legal, financial and engineering advisors.
- Evaluation of alternative ownership options for utility systems.
- Development of pro-forma operating projections for utility systems and energy projects.
- Estimation of value of electric system facilities and generation projects.
- Economic and financial analysis of utility expansion and renewal alternatives.
- Forecasting of future electric demand requirements.
- Preparation of independent engineering reviews of independent power projects for commercial banks prior to financing.
