I have been experiencing issues with my eyes which I believed must be an allergy starting last week. The symptoms increased in intensity until Saturday when the list included soar throat, loss of voice, nasal and eye discharge, eye burning and blurred vision, lack of energy. I got to see a doctor today. She prescribed medications. I have been unable to read material due eye burning or complete exhibit document list. I understand from the doctor that my symptoms should be under control in 2 or 3. Days. I am requesting an extension of due date for exhibits till Monday, April 1, 2023. I am attaching photos of the Dr. Notes and 2 pictures of the condition of my eyes
