4. The nature and extent of the Petitioner's interest in the proceeding is:

Petitioner has an interest in her family century farm land (for profit) that will be directly impacted by the transmission line.

5. The issues the Petitioner intends to raise at the proceeding are:

I intend to raise the issue of the wildfire risk the B2H Transmission line brings to the community. The proposed order under-estimates the max wind speed that Oregon building codes specify for a category three or four structure for the area. I have knowledge of alternative transmission line routes that could minimize the risk of damage to family homesteads, valuable crop land, and the local communities.

6. The special knowledge or expertise of the Petitioner that would assist the Commission in resolving the issues in the proceeding is:

I have first-hand experience as it relates to post-wildfire repercussions. The safety of humans, crops, and the environment is at extreme risk when due diligence is ignored. The potential loss from a wildfire is not limited to Idaho Power, but also the farmland owners, their crops, their livestock, their employees, and their families; not to mention the widespread power shortages caused from a wildfire disaster. It would mean devastation for entire communities, with effects that will last for many years.

7. Based on the information provided above in accordance with the Commission's rules of procedure, I request to participate in this proceeding as an intervenor. I or the organization that I represent will not unreasonably broaden the issues, burden the record, or unreasonably delay the proceeding. OAR 860-001-0300.
