

CARRIER-TO-CARRIER AGREEMENT CHECKLIST

INSTRUCTIONS: Please complete all applicable parts of this form and submit it with related materials when filing a carrier-to-carrier agreement pursuant to 47 U.S.C. 252 and OAR 860-016-0000 et al. The Commission will utilize the information contained in this form to determine how to process the filing. **Unless you request otherwise in writing, the Commission will serve all documents related to the review of this agreement electronically to the e-mail addresses listed below.**

1. PARTIES *Competitive Carrier* *Incumbent Local Exchange Carrier*

Name of Party:

Contact for Processing Questions:

Name:

Telephone:

E-mail:

Contact for Legal Questions (if different):

Name:

Telephone:

E-mail:

Other Persons wanting E-mail service of documents (if any):

2. TYPE OF FILING NOTE: Parties making multiple requests (such as seeking to adopt a previously approved agreement and Commission approval of new negotiated amendments to that agreement) should submit a separate checklist for each requested action.

Adoption: Adopts existing carrier-to-carrier agreement approved by the Commission.

- Docket ARB
- Parties to prior agreement &

New Agreement: Seeks approval of new negotiated agreement.

Does adoption or agreement replace an existing agreement between the parties?

- NO
- YES, Docket ARB

Amendment: Amends an existing carrier-to-carrier agreement.

Docket ARB

**Wireless Originated 8XX Jointly Provided Switched Access ("JPSA") Amendment
to the Interconnection Agreement between
Qwest Corporation
and
New Cingular Wireless Services, Inc. (fka AT&T Wireless Services, Inc.)
for the State of Oregon**

This is an Amendment ("Amendment") for Wireless Originated 8XX JPSA traffic to the Interconnection Agreement between Qwest Corporation ("Qwest"), a Colorado corporation, and New Cingular Wireless Services, Inc. (fka AT&T Wireless Services, Inc.) ("WSP"). Qwest and WSP shall be known jointly as the "Parties".

RECITALS

WHEREAS, the Parties entered into an Interconnection Agreement, for services in the State of Oregon, that was approved by the Oregon Public Utilities Commission on October 17, 1997, as referenced in ARB 16, Order No. 97-407 ("Agreement"); and

WHEREAS, the Parties agree to amend the Agreement under the terms and conditions contained herein.

AGREEMENT

NOW THEREFORE, in consideration of the mutual terms, covenants and conditions contained in this Amendment and other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the Parties agree as follows:

Amendment Terms

The Agreement is hereby amended by adding terms and conditions to accommodate a CLEC's (the "TCG CLEC") request described below. Such additional terms and conditions are set forth in Attachment 1 to this Amendment, attached hereto and incorporated herein by this reference. The Parties agree that WSP wants to route unqueried 8XX traffic to TCG Oregon (hereinafter "TCG CLEC") for the 800 database dip, and to route the queried traffic to IXCs served by Qwest as Jointly Provided Switched Access (JPSA) traffic via TCG CLEC's LIS trunks. WSP understands that TCG CLEC's Interconnection Agreement with Qwest, in this State, will be amended as well to reflect TCG CLEC's obligations.

Effective Date

This Amendment is subject to approval by the Commission; however, the Parties agree to implement the provisions of this Amendment upon execution. To accommodate such implementation, WSP has provided Qwest with a list of all NPA/NXXs and CLLIs associated with WSP switches which will be implementing this solution, CLLIs associated with the TCG CLEC switches which will be implementing this solution plus any additional information reasonably required by Qwest to make the internal system updates necessary to implement this solution. WSP will not begin sending 8XX traffic to TCG CLEC until TCG CLEC and Qwest have their systems in place and have been updated. Qwest shall complete all such billing system updates within a reasonable time.

Further Amendments

Except as modified herein, the provisions of the Agreement shall remain in full force and effect. The provisions of this Amendment, including the provisions of this sentence, may not be amended, modified or supplemented, and waivers or consents to departures from the provisions of this Amendment may not be given without the written consent thereto by both Parties' authorized representative. No waiver by any Party of any default, misrepresentation, or breach of warranty or covenant hereunder, whether intentional or not, will be deemed to extend to any prior or subsequent default, misrepresentation, or breach of warranty or covenant hereunder or affect in any way any rights arising by virtue of any prior or subsequent such occurrence.

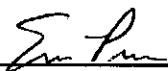

Entire Agreement

The Agreement as amended (including the documents referred to herein) constitutes the full and entire understanding and agreement between the Parties with regard to the subjects of the Agreement as amended and supersedes any prior understandings, agreements, or representations by or between the Parties, written or oral, to the extent they relate in any way to the subjects of the Agreement as amended.

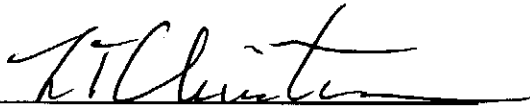

The Parties intending to be legally bound have executed this Amendment as of the dates set forth below, in multiple counterparts, each of which is deemed an original, but all of which shall constitute one and the same instrument.

ATTACHMENT 1
Wireless Originated 8XX JPSA Amendment

DEFINITIONS

"Access Services" refers to the interstate and intrastate switched Access and private line transport services offered for the origination and/or termination of Interexchange traffic.

"Meet-Point Billing" or "MPB" or "Jointly Provided Switched Access" or "JPSA" refers to an arrangement whereby two (2) or more LECs (including a LEC and WSP) receive traffic in the same LATA that the call is to be terminated in or originated from, and jointly provide Switched Access Service to an Interexchange Carrier, with each LEC (or WSP) receiving an appropriate share of the revenues from the IXC as defined by their effective switched Access Tariffs or other contractual arrangements.

"Multiple Exchange Carrier Access Billing" or "MECAB" refers to the document prepared by the Billing Committee of the Ordering and Billing Forum (OBF), which functions under the auspices of the Carrier Liaison Committee (CLC) of the Alliance for Telecommunications Industry Solutions (ATIS). The MECAB document, published by ATIS (0401004-0009), contains the recommended guidelines for the billing of an Access Service provided by two or more Telecommunications Carriers (including a WSP, LEC and/or a CLEC), or by one LEC in two or more states within a single LATA.

"Multiple Exchange Carrier Ordering and Design" or "MECOD" Guidelines for Access Services - Industry Support Interface, refers to the document developed by the Ordering/Provisioning Committee under the auspices of the Ordering and Billing Forum (OBF), which functions under the auspices of the Carrier Liaison Committee (CLC) of the Alliance for Telecommunications Industry Solutions (ATIS). The MECOD document, published by ATIS (0404120-0006), contains recommended guidelines for processing orders for Access Service which is to be provided by two or more Telecommunications Carriers (including a WSP, LEC and/or a CLEC).

"Switched Access Service" means the offering of transmission and switching services to Interexchange Carriers for the purpose of the origination or termination of telephone Toll Service. Switched Access Services include: Feature Group A, Feature Group B, Feature Group D, 8XX access, and 900 access and their successors or similar Switched Access Services.

"Switched Access Service Traffic," is traffic that originates at one of the Party's End User Customers and terminates at an IXC Point of Presence, or originates at an IXC Point of Presence and terminates at one of the Party's End User Customers, whether or not the traffic transits the other Party's network.

TYPE 2 INTERCONNECTION

Jointly Provided Switched Access Traffic, as defined in this Amendment, is a type of traffic that can be exchanged under the Agreement. Jointly Provided Switched Access Traffic is associated with Meet-Point Billing. The Parties will use industry standards developed and routed based on the LERG to handle the Provisioning and Billing of Jointly Provided Switched Access (MECAB, MECOD, and Qwest's FCC and state access Tariffs).

Jointly Provided Switched Access Services

Jointly Provided Switched Access Service is defined and governed by Qwest FCC and State Access Tariffs, Multiple Exchange Carrier Access Billing (MECAB) and Multiple Exchange Carrier Ordering and Design (MECOD) Guidelines and based on LERG routing; Jointly Provided Switched Access Service is not modified by any provisions of this Agreement. Both Parties agree to comply with such guidelines. WSP will update the LERG to reflect that TCG CLEC is the "800 SSP" for WSP's MSC.

Qwest, with WSP's support, will take the approach as outlined below to national committees to determine if documents and processes require updating to specifically address this proposal. The LERG does not specifically address this service beyond the population of 800 SSP. WSP and Qwest agree to modify this Agreement to reflect applicable new industry standards.

It is anticipated by Qwest and WSP that the originating, intermediate, and terminating LECs for switched access will cooperatively determine the Jointly Provided Switched Access arrangements.

WSP will be set up with Qwest as a "Meet Point Billing" carrier, which means that billing by Qwest to IXCs for this traffic is based on Qwest FCC Access Tariff No. 1, section 2.4.7.

Qwest will use a "proposed Billed Percentage ("BP")" in its billing tables as further outlined below. JPSA routes will be established in Qwest's tables as follows:

For traffic that terminates to WSP via Type 2 trunks from Qwest, the proposed BP will be 100% Qwest and the NECA 4 Tariff route will show only Qwest and WSP.

For 8XX traffic originated by WSP, sent to TCG CLEC and then to Qwest via the LIS facilities in place between TCG CLEC and Qwest, the proposed BP will equal the current BP between Qwest and TCG CLEC (generally 0% Qwest), and the route will show only two parties – WSP and Qwest. If it is determined later that these routes will be filed in NECA, WSP acknowledges this route would then include TCG CLEC as an intermediate carrier although the Qwest BP would be unchanged but the Parties agree that TCG CLEC would be 100%.

Once the solution is implemented, WSP agrees to the same record exchange for any other JPSA traffic they might send via Type 2 trunks through Qwest to IXCs. WSP will not receive Category 11 JPSA records from Qwest for JPSA traffic that terminates to WSP. WSP will notify Qwest if they determine in the future that they want to receive the created records from Qwest for any IXC traffic that terminates to them via the Type 2 trunks they have with Qwest.

If requested by WSP, Qwest will also provide a one-time notification to WSP of the billing name, billing address and Carrier identification codes of the IXCs subtending any Access Tandem Switches to which WSP directly connects.

Qwest agrees to function as the Access Service Coordinator (ASC) as defined in the Multiple Exchange Carrier Ordering and Design Guidelines (MECOD) (Technical Reference SR-TAP-000984). Qwest will provide the operational, technical and administrative support required in the planning, provisioning and maintenance involved in the joint access provisioning process to the IXCs.
