### Background

Executive Order 20-04 directed the Oregon Public Utility Commission to “encourage electric companies to support transportation electrification infrastructure that supports GHG reductions, helps achieve the transportation electrification goals set forth in Senate Bill 1044, and is reasonably expected to result in long-term benefit to customers.”

Staff responded with a work plan to conduct research and suggest policies that establish the foundations of a new framework for utilities and stakeholders to guide future TE investments. The process will result in a draft TE investment framework by December 2021, developed through a collaborative process. The resulting product will have a broad scope designed to improve the PUC’s TE planning guidelines and program requirements, streamline utility processes, and clarify cost-recovery criteria. The draft framework will synchronize with TE Plan filings.
