**Request for a General Rate** )  
**Revision** )

**Rebuttal Testimony of Kevin C. Higgins**

**on behalf of**

**Calpine Energy Solutions, LLC**

**August 11, 2022**

1                   **REBUTTAL TESTIMONY OF KEVIN C. HIGGINS**

2

3    **Introduction**

4    **Q.    Please state your name and business address.**

5    A.    My name is Kevin C. Higgins. My business address is 111 East Broadway, Suite  
6           1200, Salt Lake City, Utah, 84111.

7    **Q.    By whom are you employed and in what capacity?**

8    A.    I am a Principal in the firm of Energy Strategies, LLC. Energy Strategies is a  
9           private consulting firm specializing in economic and policy analysis applicable to  
10          energy production, transportation, and consumption.

11   **Q.    On whose behalf are you testifying in this proceeding?**

12   A.    My testimony is being sponsored by Calpine Energy Solutions, LLC (“Calpine  
13          Solutions”). Calpine Solutions is a retail energy supplier that serves commercial  
14          and industrial end-use customers in 18 states, the District of Columbia, and Baja  
15          California, Mexico. Calpine Solutions serves more than 15,000 retail customer  
16          sites nationwide, with an aggregate load in excess of 4,500 MW. Calpine  
17          Solutions’ retail customers are located in the service territories of more than 55  
18          utilities. In Oregon, Calpine Solutions is an Electricity Service Supplier (“ESS”)   
19          serving customers in the service territories of PacifiCorp and Portland General  
20          Electric (“PGE”).

21   **Q.    Please describe your professional experience and qualifications.**

22   A.    My academic background is in economics, and I have completed all coursework  
23          and field examinations toward a Ph.D. in Economics at the University of Utah. In

1 addition, I have served on the adjunct faculties of both the University of Utah and  
2 Westminster College, where I taught undergraduate and graduate courses in  
3 economics. I joined Energy Strategies in 1995, where I assist private and public  
4 sector clients in the areas of energy-related economic and policy analysis,  
5 including evaluation of electric and gas utility rate matters.

6 Prior to joining Energy Strategies, I held policy positions in state and local  
7 government. From 1983 to 1990, I was economist, then assistant director, for the  
8 Utah Energy Office, where I helped develop and implement state energy policy.  
9 From 1991 to 1994, I was chief of staff to the chairman of the Salt Lake County  
10 Commission, where I was responsible for development and implementation of a  
11 broad spectrum of public policy at the local government level.

12 **Q. Have you ever testified before this Commission?**

13 A. Yes. I have testified in 34 prior proceedings in Oregon, including thirteen  
14 PacifiCorp Transition Adjustment Mechanism (“TAM”) proceedings, UE 400  
15 (2023 TAM), UE 390 (2022 TAM), UE 375 (2021 TAM), UE 339 (2019 TAM),  
16 UE 323 (2018 TAM), UE 307 (2017 TAM), UE 296 (2016 TAM), UE 264 (2014  
17 TAM), UE 245 (2013 TAM), UE 227 (2012 TAM), UE 216 (2011 TAM), UE  
18 207 (2010 TAM), and UE 199 (2009 TAM). I have also participated in seven  
19 PacifiCorp general rate cases, UE 374 (2020); UE 263 (2013), UE 246 (2012), UE  
20 210 (2009), UE 179 (2006), UE 170 (2005), and UE 147 (2003), as well as the  
21 PacifiCorp Five-Year Opt-Out case, UE 267 (2013).

22 In addition, I have testified in seven previous PGE general rate cases, UE  
23 394 (2021), UE 335 (2018), UE 283 (2014), UE 262 (2013), UE 215 (2010), UE

1 197 (2008), and UE 180 (2006). In addition, I testified in the PGE New Load  
2 Direct Access Case, UE 358 (2019); the PGE Opt-Out case, UE 236 (2012); and  
3 the PGE restructuring proceeding, UE 115 (2001).

4 I also testified in the Investigation into PacifiCorp's Non-Standard  
5 Avoided Cost Pricing, UM 1802 (2017); the 2017 Inter-Jurisdictional Allocation  
6 proceeding, UM 1050 (2016); and Phase II of the Investigation into Qualifying  
7 Facility Contracting and Pricing, UM 1610 (2015).

8 **Q. Have you testified before utility regulatory commissions in other states?**

9 A. Yes. I have testified in approximately 240 proceedings on the subjects of  
10 utility rates and regulatory policy before state utility regulators in Alaska,  
11 Arizona, Arkansas, Florida, Georgia, Idaho, Illinois, Indiana, Kansas, Kentucky,  
12 Michigan, Minnesota, Missouri, Montana, Nevada, New Mexico, New York,  
13 North Carolina, Ohio, Oklahoma, Pennsylvania, South Carolina, Texas, Utah,  
14 Virginia, Washington, West Virginia, and Wyoming. I have also prepared  
15 affidavits that have been filed with the Federal Energy Regulatory Commission.

16

17 **Overview and Conclusions**

18 **Q. What is the purpose of your rebuttal testimony?**

19 A. My testimony responds to the discussion among the parties regarding the structure  
20 of the Transition Adjustment Mechanism ("TAM") and the TAM guidelines. I  
21 also request that the Commission clarify the terms under which a direct access  
22 customer participating in the three-year opt-out program can switch to the five-  
23 year opt-out program prior to the end of the customer's three-year opt-out term.

1 **Q. Please summarize your recommendations.**

2 A. I offer the following recommendations:

3 1) I agree with the Alliance of Western Energy Consumers (“AWEC”) and  
4 Citizen’s Utility Board (“CUB”) that PacifiCorp’s proposal to add a “rate year  
5 update” to the TAM should be rejected by the Commission, as it adds an  
6 unnecessary layer of rate changes for customers. However, in the event that the  
7 Commission accepts the Company’s rate year update proposal, then I agree with  
8 AWEC that it would be appropriate to add a second direct access shopping  
9 window to align with the updated rates. If the Commission does not approve of a  
10 second shopping window, then I recommend that the current shopping window be  
11 moved from November to March to better match the period used for setting rates  
12 for Cost-Based service in the TAM year.

13 2) I recommend that the TAM guidelines be modified to state that  
14 PacifiCorp’s provision of the Schedule 296 calculations used to calculate the  
15 Consumer Opt-Out Charge within 30 days of filing the TAM will be accompanied  
16 by all supporting work papers, as recently agreed in a stipulation submitted by  
17 parties to the 2023 TAM case, UE 400.

18 3) I recommend that the Commission make clear in its order in this case  
19 that a customer participating in the three-year opt-out program can switch to the  
20 five-year opt-out program under the going-forward terms of the five-year  
21 program, without being subject to the Returning Service Payment or other  
22 penalty, after the end of the first or second full year in the three-year program.

23

1

2 **TAM Structure and Guidelines**

3 **Q. What aspect of TAM structure are you addressing?**

4 A. I am addressing the rate year update that PacifiCorp has proposed for the TAM.  
5 The Company is proposing to modify the TAM by adding an update that would  
6 reset Schedule 201 during the rate year to reflect the latest official forward price  
7 curve, the latest short-term purchases and sales, and the most recent hydrologic  
8 forecast for the test year. The rate year update filing would occur on March 1 of  
9 the rate year, with a rate effective date of April 1.<sup>1</sup>

10 PacifiCorp's proposal is opposed by AWEC and CUB. AWEC points out  
11 that the proposal would result in another rate change within a year and  
12 unreasonably shifts risk associated with the net power cost forecast from  
13 PacifiCorp to ratepayers, increasing rate variability and resulting in increased  
14 uncertainty for customers.<sup>2</sup> CUB argues that the proposal would increase rate  
15 volatility for customers and add an additional burden on the regulatory process.<sup>3</sup>

16 **Q. Do you agree with these concerns expressed by AWEC and CUB?**

17 A. Yes. Moreover, from the standpoint of customers seeking direct access service,  
18 PacifiCorp's proposal creates a mismatch between the transition adjustment  
19 calculated for customers entering direct access service in the rate year and the  
20 Schedule 201 rates that would actually be in effect for most of that year. AWEC  
21 recognizes this problem and proposes that if the Company's proposal is adopted,

---

<sup>1</sup> PAC/400, Wilding/4-5.

<sup>2</sup> AWEC/100, Mullins/28.

<sup>3</sup> CUB/200, Gehrke/2.

1 then a second shopping window should be made available to correspond to the  
2 updated TAM rates.<sup>4</sup> I agree.

3 **Q. How has PacifiCorp responded to AWEC's proposal for a second shopping**  
4 **window?**

5 A. PacifiCorp does not support AWEC's proposal for a second shopping window.  
6 The Company responds that while AWEC is correct that one purpose of the TAM  
7 is to calculate transition adjustments, the "other purpose" is to calculate net power  
8 costs for cost-of-service customers. PacifiCorp contends that the goal of its rate-  
9 year update is to capture costs that are uniquely applicable to cost-of-service  
10 customers and not direct access customers, so the fact that there is a mismatch in  
11 these costs is appropriate.<sup>5</sup>

12 **Q. What is your response to the Company's reply to AWEC on this point?**

13 A. I have been participating in TAM proceedings since 2008, which was  
14 PacifiCorp's fourth TAM. AWEC's characterization that the fundamental  
15 purpose of the TAM is to set the transition adjustment for direct access service is  
16 correct. That is why it is called the TAM. As the Commission stated in its  
17 its initial order authorizing the TAM structure that is in place today:

18 The purpose of the TAM is not to promote direct access, as ICNU would have us  
19 do. Rather, the TAM is to capture costs associated with direct access, and  
20 prevent unwarranted cost shifting.<sup>6</sup>  
21

---

<sup>4</sup> AWEC/100, Mullins/29.

<sup>5</sup> PAC/1500, Mullins/20-21.

<sup>6</sup> UE 170, Order No. 05-1050 at 21.

1           When the Commission initially determined that net power costs for cost-of-  
2           service customers were to be adjusted as part of the TAM, it was not done for its  
3           own sake, but rather to ensure that there was no mismatch between cost-of-service  
4           rates and the transition adjustment that was calculated relative to those rates. At  
5           least that was the original idea. As described by the Commission that initial  
6           order:

7           PacifiCorp’s proposed TAM relies on its power cost model, GRID. PacifiCorp  
8           proposes to make two GRID runs for each rate schedule, one with full Oregon  
9           load and one with a 25 MW load reduction shaped according to the rate schedule.  
10          These runs will be used to calculate the weighted market value of the energy used  
11          to serve direct access customers. The TAM then calculates the adjustment by  
12          comparing the weighted market value to the cost of service rate under the  
13          customers’ specific, energy-only tariff. *Included in the process is an annual*  
14          *power cost update to ensure that both the weighted market value and the cost of*  
15          *service are calculated for the same period using the same data.*<sup>7</sup>  
16

17          I do not dispute that since its inception the TAM has been transformed into a  
18          ratemaking exercise that is concerned primarily with net power costs recovered  
19          from cost-of-service customers. But that is not the reason it was created in the  
20          first place. Ironically, after PacifiCorp successfully argued in UE 170 that  
21          updates to net power cost were necessary to accurately measure the transition  
22          adjustment, the Company now argues that the TAM’s “other purpose” can  
23          proceed independently of the transition adjustment and be adjusted without regard  
24          to direct access. I encourage the Commission not to proceed further down this  
25          slippery slope.

---

<sup>7</sup> *Id* at 20 (emphasis added).

1 **Q. If the Commission allows PacifiCorp to implement a rate year update in the**  
2 **TAM, but does not require a second shopping window as proposed by**  
3 **AWEC, is there another alternative that should be considered?**

4 A. Yes. While I believe the preferred alternative is simply to reject PacifiCorp's  
5 proposal, and the next best alternative is to accept AWEC's proposal for a second  
6 shopping window, a third alternative would be to move the shopping window and  
7 final calculation of the transition adjustment from November to March. That  
8 would at least align the transition adjustment with the final cost-of-service rates  
9 for the majority of the rate year.

10 **Q. Turning to the TAM guidelines, Staff has proposed that PacifiCorp provide**  
11 **“Workpapers and all supporting documents underlying each of the**  
12 **Company’s models or adjustments, either existing or newly proposed” as**  
13 **soon as possible after the initial filing.<sup>8</sup> Do you have any additional**  
14 **comments regarding the TAM guidelines?**

15 A. Yes. Staff explains that the current requirement of submitting data requests to  
16 obtain such materials is inefficient to the processing and prompt resolution of the  
17 TAM.<sup>9</sup> PacifiCorp's reply testimony states it needs additional clarification of  
18 Staff's specific proposal for additional work papers supporting the initial filing.<sup>10</sup>  
19 While Calpine Solutions takes no position on the work papers supporting the  
20 initial filing proposed for inclusion in the guidelines by Staff, a similar problem

---

<sup>8</sup> See Staff/900, Enright/14-16.

<sup>9</sup> Staff/900, Enright/15-16.

<sup>10</sup> PAC/1500, Wilding/6.

1 has recently been addressed concerning PacifiCorp's provision of the Schedule  
2 296 sample calculation as part of its TAM filing.

3 The current TAM guidelines require PacifiCorp to provide a sample  
4 calculation of Schedule 296 rates within 30 days of filing the TAM. In the 2023  
5 TAM docket, UE 400, parties submitted a stipulation clarifying that the sample  
6 calculations would be accompanied by all supporting workpapers. I recommend  
7 that the Commission approve this clarification in this proceeding as well to ensure  
8 the final TAM guidelines reflect the parties' agreement from the UE 400  
9 proceeding. This change is necessary because in the 2023 TAM, the Company's  
10 filing of the Schedule 296 sample calculation was not accompanied by supporting  
11 work papers. Instead, the work papers had to be obtained through discovery,  
12 adding unnecessary delay for any party investigating this subject.

13

14 **Switching from the Three-Year Opt-Out Program to the Five-Year Opt-Out**

15 **Program**

16 **Q. Please describe the clarification you are seeking regarding the ability of a**  
17 **customer in the three-year opt-out program to switch to the five-year opt-out**  
18 **program.**

19 **A.** By way of background, PacifiCorp offers one-year, three-year, and five-year  
20 direct access programs to existing customers.<sup>11</sup> Customers that select the one-  
21 year program can return to cost-of-service rates without penalty after completing

---

<sup>11</sup> Qualifying new customers may also participate in the NLDA program.

1 twelve months of direct access service or else select another direct access option  
2 for which the customer is eligible upon the completion of the twelve-month  
3 period. If a customer selects another direct access program, their ability to return  
4 to cost-of-service rates without penalty is governed by the terms of the direct  
5 access program they select. Customers in the three-year program can return to  
6 cost-of-service rates without penalty after three years of direct access service,  
7 whereas customers in the five-year opt-out program must provide four-years'  
8 notice to return to cost-of-service rates without penalty.

9 There is no ambiguity in PacifiCorp's tariff regarding the choices that a  
10 customer in the three-year opt-out program has after completion of the three-year  
11 term. The customer can either choose to return to cost-of-service rates without  
12 penalty or else select another direct access option for which the customer is  
13 eligible, such as the one-year program, three-year opt-out, or five-year opt-out.

14 The need for clarification concerns the ability of a customer in the three-  
15 year program to switch to the five-year opt-out program (during the annual  
16 shopping window) before completing three full years in the three-year program.  
17 That is, can the customer elect the five-year opt-out program under the applicable  
18 going-forward terms of the five-year program, without penalty, after the end of  
19 their first or second full year in the three-year program? I believe that under the  
20 structure of PacifiCorp's tariff – as well as the underlying logic of the applicable  
21 transition charges – the reasonable answer to this question is “yes.” However,  
22 based on informal discussions between Calpine Solutions and PacifiCorp in which  
23 I have participated, my understanding is that the Company does not agree.

1           This is a timely issue for resolution in this case because customers  
2           currently enrolled in the three-year program may wish to make such an election in  
3           upcoming shopping windows, and resolution of the issue in a proceeding such as  
4           this one before the shopping window will prevent disputes that would need to be  
5           resolved on an expedited basis. Calpine Solutions did not raise this issue in its  
6           opening testimony because discussions with PacifiCorp on the subject were  
7           ongoing in the hopes that there would be no disagreement necessitating  
8           Commission resolution, but now it appears there is a disagreement that needs to  
9           be resolved by the Commission with respect to PacifiCorp’s tariff at issue in this  
10          general rate case.

11           Consequently, I am recommending that the Commission make clear in its  
12          order in this case that a customer participating in the three-year opt-out program  
13          can switch to the five-year opt-out program under the going-forward terms of the  
14          five-year program, without penalty, after the end of the first or second full year in  
15          the three-year program.

16          **Q. Please clarify what you mean by the term “without penalty.”**

17          A. Schedule 201 (Net Power Costs Cost-Based Supply Service) in the PacifiCorp  
18          tariff requires that direct access customers who wish to return to cost-of-service  
19          rates prior to the full term of their direct access service must make a Returning  
20          Service Payment.<sup>12</sup> PacifiCorp’s Schedule 201 states that the Returning Service  
21          Payment “compensates for the increased cost of serving such returning Consumer  
22          due to an increase in market price as compared to the market price used in

---

<sup>12</sup> PacifiCorp Schedule 201, p. 4.

1 determining the Consumer’s applicable transition credit as specified under  
2 Schedule 294.”<sup>13</sup> The Returning Service Payment is calculated by multiplying the  
3 expected remaining monthly usage under direct access service times the  
4 difference between the forward market price at the time of the customer’s request  
5 to return to Cost-Based Supply Service and the forward market price used for  
6 determining the Schedule 294 Transition Adjustment, times 110 percent. When I  
7 use the term “without penalty” I mean that the customer would not be subject to  
8 the Returning Service Payment.

9 **Q. Is it your understanding that PacifiCorp would require a customer switching**  
10 **from the three-year opt-out program to the five-year opt-out program prior**  
11 **to the end of their three-year term to pay a Returning Service Payment?**

12 A. Yes. As I understand the Company’s position, if a customer in the three-year  
13 program requests to move into the five-year program after, say, one year in the  
14 three-year program, the customer would be subject to the Returning Service  
15 Payment for the remaining two years of their three-year opt-out term – even  
16 though the customer would not be returning to cost-of-service rates, but rather  
17 switching to another direct access program.

18 **Q. Why do you believe that switching from the three-year opt-out to the five-**  
19 **year opt-out should already be permitted without penalty under the**  
20 **structure of PacifiCorp’s current tariff?**

21 A. By way of background, direct access customers who are not in the new load direct  
22 access program (“NLDA”) program are subject to a transition adjustment. The

---

<sup>13</sup> PacifiCorp Schedule 201, p. 4.

1 transition adjustment provides a credit or charge for customers who choose direct  
2 access service. The transition adjustment is applied either through Schedule 294,  
3 Schedule 295, or Schedule 296. Schedule 294 is applied to customers who  
4 choose a one-year direct access option, Schedule 295 is applied to customers who  
5 choose a three-year direct access option, and Schedule 296 is applied to customers  
6 who select the five-year opt-out (for the first five years).

7 According to the Company's tariff, Schedule 295 (Transition Adjustment,  
8 Three-Year Cost of Service Opt-Out) applies to customers who, among other  
9 things, have opted out of Cost-Based Supply service for a minimum of three  
10 years. A customer in the three-year opt-out program who switches to the five-  
11 year opt-out program would not be violating the minimum term requirements of  
12 the three-year program because they would be extending their opt-out from cost-  
13 of-service rates, not reducing the term of their opt-out. This extension of the  
14 customer's direct access service term stands in obvious contrast to a customer in  
15 the three-year opt-out program who requests to return to cost-of-service rates  
16 before completing the three-year opt-out. Such a customer would properly be  
17 subject to the Returning Service Payment. This situation is fundamentally  
18 different from a customer seeking to make a more permanent move to direct  
19 access service. Yet it is my understanding that PacifiCorp would treat both  
20 situations equivalently, subjecting the customers in both situations to the same  
21 Returning Service Payment. This interpretation is inconsistent with the tariff and  
22 is fundamentally illogical.

1 **Q. Why do you believe it is illogical to require a Returning Service Payment**  
2 **from a customer that switches from the three-year opt-out program to the**  
3 **five-year opt-out program?**

4 A. First and foremost, the Returning Service Payment is intended to recover the  
5 incremental costs (plus a 10% penalty) to accommodate customers that wish to  
6 return to cost-of-service rates prior to completing their minimum direct access  
7 term. A three-year opt-out customer that switches to the five-year opt-out  
8 program is not returning to cost-of-service rates. The entire notion of subjecting  
9 them to a Returning Service Payment is misplaced and arbitrary. As noted above,  
10 PacifiCorp's tariff itself states that the Returning Service Payment "compensates  
11 for the *increased cost of serving such returning Consumer* due to an increase in  
12 market price as compared to the market price used in determining the Consumer's  
13 applicable transition credit as specified under Schedule 294."<sup>14</sup> If the customer is  
14 not returning to PacifiCorp's cost-of-service rates, there is no increased cost to  
15 serve the customer and there is no need to compensate PacifiCorp for such non-  
16 existent costs.

17 **Q. But would a three-year opt-out customer that switches to the five-year opt-**  
18 **out program be gaining some kind of unfair economic advantage?**

19 A. No. Both a three-year opt-out customer and a five-year opt-out customer are  
20 required to pay the same Schedule 200 charges to recover PacifiCorp's fixed  
21 generation costs, the latter for five years. A three-year opt-out customer that  
22 switches to the five-year opt-out program should be subject to the same Schedule

---

<sup>14</sup> PacifiCorp Schedule 201, p. 4 (emphasis added).

1 296 charges as any new five-year opt-out customer. This means that a three-year  
2 opt-out customer that switches to the five-year program would be subject to a  
3 longer period of transition adjustments overall – and would pay Schedule 200  
4 charges for as long as six or seven years (depending on whether they switched  
5 from the three-year program after year 1 or year 2) compared to five years of  
6 Schedule 200 payments for a new five-year opt-out customer. There is no unfair  
7 economic advantage conveyed to a three-year customer from this arrangement.

8 Moreover, allowing the three-year opt-out customer to switch to the five-  
9 year program after one or two years does not convey an unfair economic  
10 advantage compared to a customer in the one-year direct access program because  
11 the underlying transition adjustment calculations are identical between the two  
12 programs. That is, in any given TAM year, the Schedule 294 transition  
13 adjustment for the one-year program is identical in its core calculation to year one  
14 of the Schedule 295 transition adjustment for the three-year program, even though  
15 the charges between the two programs have somewhat different rate designs.<sup>15</sup>

16 A one-year direct access customer is free to return to cost-of-service rates  
17 after twelve months of direct access service or, if they qualify by meeting the  
18 minimum load requirements, enter the five-year program without penalty. In  
19 contrast, a three-year direct access customer cannot return to cost-of-service rates  
20 after twelve months without penalty. But having paid the same transition charge

---

<sup>15</sup> The one-year program has a different TAM rate each month (further differentiated by heavy load hours and light load hours) and the three-year program has a flat TAM rate for a given year (also differentiated by heavy load hours and light load hours), but it is calculated using identical inputs for year 1 as the one-year program.

1 (including Schedule 200) as a one-year direct access customer, there is no unfair  
2 economic advantage conveyed to the three-year opt-out customer by allowing  
3 them to enter the five-year program without penalty after twelve months in the  
4 three-year program, just as a one-year direct access customer can do after twelve  
5 months in the one-year program.

6 **Q. Please summarize your recommendation to the Commission concerning the**  
7 **ability of a customer in the three-year opt-out program to switch to the five-**  
8 **year opt-out program.**

9 A. I recommend that the Commission make clear in its order in this case that a  
10 customer participating in the three-year opt-out program can switch to the five-  
11 year opt-out program under the going-forward terms of the five-year program,  
12 without being subject to the Returning Service Payment or other penalty, after the  
13 end of the first or second full year in the three-year program.

14 **Q. Are there any changes to the language of PacifiCorp's tariff that are**  
15 **required to accommodate allowing a customer in the three-year program**  
16 **switching to the five-year program?**

17 A. No, I do not believe so. However, if PacifiCorp identifies any provisions of its  
18 tariff that contradict my proposal, I recommend that the Commission also order  
19 PacifiCorp to make revisions to its tariff to allow the three-year customers to  
20 switch to the five-year program. A general rate case is an appropriate proceeding  
21 to make such changes, and any needed changes on the point are supported by the  
22 reasons I explained above.

23 **Q. Does this conclude your rebuttal testimony?**

1 A. Yes, it does.
