CUSTOM CALLING SERVICE

5.6 CONDITIONS (Cont'd)

- I. Hotline service requires the user to place the telephone in an off-hook condition. The line is then automatically routed to a predetermined local or long distance telephone number.
- J. From time to time, the Company may provide a special promotion to its customers. The offering may be limited to certain dates, times, and locations. Customers who subscribe to new Custom Calling service and are not satisfied with the new service after one month will be eligible for a refund. Under this promotion, each eligible customer who requests a refund shall be allowed a one month credit for each new Custom Calling service that is not satisfactory.
- K. Privacy Protector works to intercept unidentified callers. Calls that can be identified by Caller ID are completed as normal calls. Calls that cannot be identified are intercepted and routed to an announcement, which states that the called number does not accept calls from telemarketers. Callers are advised to hang up if they are a telemarketer or press 1 if they are not a telemarketer. Callers pressing 1 will have the call completed to the called number. The Privacy Protector feature can be activated and deactivated by the subscriber. This feature requires that the subscriber must also subscribe to Caller ID.
- L. Outbound Call Block Feature blocks all outbound dialing with the exception of abbreviated dialing for 911 (Enhanced Universal Emergency Number Service) and 711 (Telecommunications Relay Service). In addition, all pay-per-use features are blocked. All other Custom Calling Services features and Custom Calling II features are prohibited with the use of this feature and lines equipped with this feature will not have a directory listing. This feature is subject to the availability of facilities and is only available to flat rate business and residence one-party line service customers.
