

All,

As part of the Commission's duties under Senate Bill 1547 Staff is opening Docket AR 599 to draft proposed rules that will help guide our regulated utilities' December 2016 Transportation Electrification program proposals pursuant to Section 29 of SB 1547.

Attached you'll find an initial discussion proposal regarding possible elements of a draft proposed rule. We would like to open a conversation with stakeholders on May 10<sup>th</sup> from 1-4PM in Salem at the Commission's Main Hearing Room. Following this initial meeting, stakeholders will have an opportunity to submit their comments to Staff through Docket AR 599 by May 16<sup>th</sup>.

Please review the attached discussion proposal and be prepared to share your thoughts about the necessary rule elements that will guide utility Transportation Electrification program proposals. In reviewing the document, we welcome broad thinking, balancing detail with necessity. Additionally, at the meeting Staff will share with attendees Staff's initial draft timeline of events and procedural requirements.

**To be added to the service list for AR 599 please email Diane Davis: [diane.davis@state.or.us](mailto:diane.davis@state.or.us)**

Thank you,  
Jason

## **Commission's Proposed: Transportation Electrification Application Information**

The Commission would like to discuss with stakeholders the following proposed information for submittal in Utility 2016 Transportation Electrification program proposals.

1. Required demonstration of pre-application stakeholder engagement including market participants and other state agencies working on transportation.
2. The application will be submitted in the form of a multi-year plan (3-5 years). Each plan will demonstrate how the proposed programs and measures work together as a long-term strategy to meet the goals of the legislation. Each plan will include:
  - a. Demonstration of Market Transformation
    - i. Current state of the market
    - ii. How the market is moved through the plan and program implementation
    - iii. Identified market barriers and strategy to address
    - iv. Identified market success indicators and how they will be reached
    - v. Market Exit Plan
  - b. Program development and implementation plan including
    - i. Program description
    - ii. Program timeline
    - iii. Costs and benefits
      1. Rate impacts
3. Demonstration of coordination with the clean fuels program and other state policies that are meant to either support or move the EV or clean transposition sector in Oregon.
4. Each program will have a third party evaluation; the evaluator will evaluate each program on its own merits and with the context of the broader plan.
5. Plans will be submitted for acknowledgment by the Commission however, ratemaking will be determined later most likely in a rate case.

## DAVIS Diane
